### **Nature of the Line**

The *ihb716Tg* allele is a transgenic line and the transgenic construct contains a GFP expression cassette regulated by inducible Gal4/UAS system which is driven by macrophage expressed 1 promoter *mpeg1*.

### **Genotyping assay**

Genotyping of the *ihb716Tg* allele is based on the fluorescent microscope. As identified by fluorescent microscope, the GFP fluorescence signal is detectable in macrophage-specific cells.
